LACOBEL & MATELAC.
WONDERFUL COLOURFUL MATCH

To tone in colour with the new design trends, AGC combines the forces of two painted glass ranges: glossy Lacobel and satin Matelac. We have created five new colours to inspire designers and architects. Trendsetting interiors match smooth textures with brilliant surfaces that create surprising perspectives. Pure zen-like spaces are energized with vivid colour accents. This is an ideal playground for Lacobel reflections and Matelac opacity.

Matelac
Anthracite Authentic
Ref 7016

Lacobel
Orange Classic
Ref 2001

Reflect authenticity in vivid colour

Authenticity and tradition are two keywords of contemporary design. Raw materials, wood textures and handcrafted objects are lifted by the painted glass doors and table tops in brilliant Lacobel orange. The opaque Matelac surfaces in authentic anthracite counterbalance the vibrant, glossy effect.

Add spice and perspective by contrasting painted glass surfaces in dark and light, glossy and matt. The bathtub and walls in brilliant pastel blue Lacobel cladding is in perfect harmony with the natural brown Matelac wall panel.

Matelac
Brown Natural
Ref 7013

Lacobel
Blue Pastel
Ref 1603

Bathe in brilliance softened by satin

Lacobel
Beige Light
Ref 1015

Lacobel
Red Dark
Ref 3004

Open new colourful perspectives

Turn sliding doors into a work of art. The opposition of light beige and dark red Lacobel sheets creates a cubist canvas that reflects the natural tones and shapes of handcrafted furniture and ethnic fabrics.

ENHANCE YOUR REFLECTION

Painted glass offers a kaleidoscopic variety of colours and mirror effects. Combining Lacobel and Matelac adds extra power to your palette; capture the light in Matelac satin colour and reflect it in scintillating Lacobel tints. The Matelac and Lacobel ranges share different colours for “tone-on-tone” creations; brown, anthracite, yellow and blue.

'MyColour' by Lacobel Customize your reflections

MyColour by Lacobel is a service offering the possibility to order painted glass in millions of colours for orders of at least 200 m². Enjoy the freedom to create the wall cladding and furniture that perfectly match the colours of your design, your brand or your corporate house-style. You can even write on it and use it as a whiteboard.

Choose and create any colour you like

Inspired by light and colour

Lacobel
Blue Petrol
Ref 5001

Painted glass is a multifaceted material. It inspires in as many ways as it reflects light. It brings depth, movement and perspectives to your rooms and adds vibrant patches of colour to interiors.

Give craftsmanship innovative lustre

Lacobel
Green Pastel
Ref 1604

'Versatility' is a dominant trend in contemporary design: mixing heritage and modernity, making a synthesis between innovation and tradition to celebrate universal beauty. A pastel green Lacobel cladding gives a neoclassical yet 21st century allure.

Lacobel
Yellow Rich
Ref 1023

Matelac
Yellow Rich
Ref 1023

Discover new and surprising possibilities for 'tone-on-tone' designs. The yellow Matelac doors absorb and caress the light with satin softness, while the Lacobel cladding reflects movement and depth in a warm yellow perfectly matching the natural wood elements. The Lacobel and Matelac ranges are complimentary to perform this magic.

A duet of brilliance and opacity

Lacobel Colour Chart

Lacobel has a paint layer on the back of the glass. This protects it from any damage and keeps the colour and glossy appearance of the glass in brilliant shape. Lacobel glass can only be used for interior applications: furnishings, wall covering or even as writing board.

Matelac Colour Chart

Matelac has one painted side and one acid-etched side. The sophisticated etching procedure gives the glass a satin finish. The high quality paint at the back of the glass results in a fine, opaque colour finish. Matelac has many interior design applications: wall covering, doors, tables, shelving units and wardrobes.

MyColour by Lacobel

Design and create with Lacobel painted glass in any colour you like. With MyColour by Lacobel you can order the colour that matches your project seamlessly, while meeting all Lacobel quality standards. This tailor-made service starts at 200 m² per colour. Ask your AGC representative for more information.

Other aspects

Water resistant	Yes	- All Lacobel/Matelac colours can be used in wet/humid areas (bathrooms and kitchens) but cannot be immersed in water. - The metallic colours Metal Grey, Metal Taupe, Rich Aluminium and Starlight Black must be fitted with a Safe film for use in wet/humid areas. - Lacobel/Matelac must be protected from any water infiltrating at the back of the glass (use silicones for joints).
UV resistant	Yes	The colours are fixed during the production process (no discolouring possible).
Bending resistance	Yes	Identical to float glass
Bending/Fitting	Yes	See installation guide in www.yourglass.com
Easy to maintain	Yes	

> Benefits & Applications

- Lacobel and Matelac glass have multiple applications for interiors, such as wall claddings, partitions, furniture, doors,...
- The Lacobel and Matelac ranges combine a pure and contemporary look with an easy maintenance and a high resistance to stains.
- All Lacobel and Matelac colours can be used in humid environments, such as bathrooms and kitchens.
- For extra safety a Safe film can be placed on the painted side of the glass. It allows for better protection in case of breakage, avoiding injury or damage.
- AGC's manufacturing process guarantees a uniform finishing, ensuring that the paint adheres flawlessly to the glass.
- All Lacobel and Matelac paints are environmentally friendly. No formaldehydes were detected based on the stringent JIS standard "Method for testing formaldehyde emission from paint film - Desiccator method" (version 2000).
