

# Foamfix

**Foamfix is a single component, moisture cure, polyurethane construction foam suitable for a wide range of sealing and gap filling applications.**

Ideal for use in the fixing of window and door frames and can reduce the number of mechanical fixings required whilst also increasing the rigidity of the structure.

#### **Low post expansion**

Reduces the risk of damage to surrounding substrates due to pressure caused by expansion in enclosed spaces.

#### **Fast curing**

When cured the foam can be cut or sawn. Compatible with paint, plaster and sealants.

#### **Excellent insulation**

High thermal and acoustic insulation value

#### **High adhesion**

Excellent adhesion to a wide variety of building materials such as brick, concrete, metal, wood, stone, plaster and PVC-U.

#### **Gun grade foam**

Gun applied for added control and ease of application with reduced waste.

#### **Foamfix Cleaner**

Foamfix Cleaner is also available for cleaning any uncured foam and the applicator gun.
