

Foamfix (Gun applied)

A single component, moisture cure, polyurethane construction foam suitable for use on a wide range of sealing and gap filling applications.

KEY FEATURES

Low post expansion.
Fast curing.
High adhesion.
High thermal and acoustic insulation properties.
Weatherproof and will not rot.
Totally cured foam is chemically inert.

PROPERTIES

Can or applicator temperature range:
+10°C to +30°C (+20° for optimal performance).

Foamfix Cleaner

Foamfix Cleaner is rapid-acting and easy to apply and is suitable for the removal of UNCURED Polyurethane Foam such as Hodgson Sealants Foamfix Grade from the applicator gun and foam can valves. It can also be used for cleaning uncured overspill from contaminated surfaces. Manufactured under a ISO 9001:2008 Quality System

KEY FEATURES

Proven quick removal of uncured foam.
Easy to use; the can attaches to the applicator gun.
The can will provide multiple uses.

PROPERTIES

Can or applicator temperature range: +10°C to +30°C (+20° for optimal performance).

PU Foam Gun

Suitable for use with Foamfix Expanding Polyurethane Foam and Foamfix Cleaner. The applicator gun provides control and ease of application with reduced waste.
