

THE WHOLESALE GLASS CO.

Q

# EASY GLASS® WALL

A GLASS WALL  
AND RAILING IN ONE

This glass partition is held by elegant aluminium profiles at floor and ceiling

## Open up your staircase

Why would you create a light and airy staircase then close it in with an opaque wall? Use Easy Glass® Wall and make your design an eye-catching feature. The system provides an all-glass, floor-to-ceiling partition that also fulfils the role of a balustrade. In addition to showing off your staircase design, the glass will allow natural light to flood in.

- Light and medium use ceiling-high partitions for indoor and outdoor settings
- Easy mounting confirmed by a reassuring click
- For glass up to 3.5 m high and a variety of span widths
- Compatible with Q-railing's glass mounted handrails and brackets
